

ACCESS SCAFFOLDING

The Aluminium Scaffold Specialist

Helpful solutions for all your scaffolding requirements

Thank you for choosing **Access Scaffolding 440 Series**

ACCESS SCAFFOLDING have been providing aluminium scaffold hire for over 25 years. We have trained and skilled personnel for complete project solutions and a large inventory on hand to ensure your orders are fulfilled quickly and on time.

Access Scaffolding are familiar with the challenges of competitiveness, safety, licensing and legislative requirements AND completing the task to our customers requirements.

We manufacture our own hand-welded Australian Made Scaffolds. Our 440 Series Scaffold is manufactured with the hire and construction industry in mind. It will withstand the harsh conditions that many imported aluminium scaffolds will not. We have scaffold in our hire fleet that has had over 20 years of continuous use and is still going strong.

- Access Scaffolding uses 6061 T6 tempered aluminium tube with a 2.6mm wall thickness which gives greater strength in the form of impact resistance and less deflection under load.
- The outside diameter of the tube is 48mm and allows you to use conventional low cost steel scaffold couplers without damaging your tube.
- The grasper ends and spigots are also Australian Made and are designed for ease of use and repair. A double width platform scaffold (1.3m wide) has a safe working load of 450kg which means it will carry a load of persons and materials of up to 450kg per working level per bay.
- Single width scaffolds (0.75m wide) will carry a load of persons and materials of up to 225kg per working level per bay.

Access Scaffolding 440 Series scaffold is light to handle and quick to erect, saving you time and money.

Ring us now for a free quote or enquire about your scaffolding hire and sales needs on 1300 133 922 or enquiries@accessscaffolds.com.au and connect to our website accessscaffolds.com.au for all technical data, JSA and current compliances.

Best regards
